Mr. Don Clark
Precision Airparts Support Services
10555 Stanford Avenue
Garden Grove, CA 92840

December 14, 2000

Dear Don:

As the end of the year approaches for us, we at Honeywell Flight Test Operations conduct a look back at our efforts, and evaluate our accomplishments and goals for the future. As part of this process, we include a look outside of our organization to those we depend on to help us do our job.

In that light, Honeywell Flight Test Operations would like to thank you personally, and your entire staff for the outstanding support your organization has provided to us this past year. We have noted with great pleasure the prompt service and attention to our needs for starter overhauls, pressure controllers, outflow valves and other components.

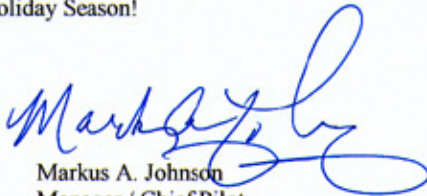

We have also found your organization and your people a valuable source of technical information and support. Your team has helped make our job a success this year, and we hope you will share our sincere thanks with everyone at Precision Airparts Support Services.

We look forward to continuing this fine business relationship with P.A.S.S. into the year 2001 and beyond. Have a very Happy Holiday Season!

Regards,

Alan B. Torget
Chief of Maintenance
Honeywell Flight Test

Markus A. Johnson
Manager / Chief Pilot
